The HF 15 kW system is wholly designed and produced by Rampoldi X-Ray and is composed by a HF 15 kW monoblock generator with rotating anode in oilbath with a high voltage transformer and is controlled by a feedback circuit. The monoblock generator is fed and controlled by a high frequency power inverter.

Product manufactured with certified system **UNI EN ISO 13485**.

According to customer requirements the X-Ray tube can be of different brands and have different focus.

TECHNICAL DATA – MONOBLOCK GENERATOR

Power:	15 kW
Max Voltage:	120 kV
Max Current:	200 mA
Current Max. Performance:	120 mA
Frequency:	40 kHz
Monoblock Size:	31x14x25 cm
Weight:	19 Kg

X-RAY TUBE

Monofocal and Bifocal Rotating Anode Tube

Focal Spot:	0,8 – 1,3 mm
Focus:	11 – 27 kW
Heat Capacity:	80 kj – 107 kHU
Anode Angle:	15°
Anode Diameter:	64 mm
Max. Anode Heat Dissipation:	300 W
Anode Rotation:	2800 rpm

INVERTER

Power:	15 kW
Line Voltage:	325 V.D.C.
Max Frequency:	20 kHz a IGBT
Protection:	Shortcircuit Overcurrent
